

Solutions / Partner Integration Engineer

Software Engineer with 6+ years in Dubai delivering API/SDK integrations, partner implementation support, internal products and technical tooling. Supported platform adoption across 50+ Android and React Native applications, built employee-facing solutions adopted by 400+ users, and developed reusable mobile, wearable and automation tooling.

EXPERIENCE

Software Engineer — API/SDK Integrations, Partner Solutions & Wearables Jan 2020 - Present
Huawei Technologies Dubai, UAE

API/SDK Integrations & Partner Enablement

- Delivered SDK/API integrations and partner implementation support across 50+ Android and React Native applications from 2020 to 2024, including Dubai Police, MAF Carrefour, Virgin Mobile and Visit Abu Dhabi.
- Built reusable React Native plugins for location and site-discovery integrations, reducing repeated partner implementation work.
- Assessed Android dependencies and resolved SDK, Firebase/GMS compatibility and app-submission blockers, helping enterprise partners bring Huawei-compatible Android releases to production.
- Delivered workshops and support sessions introducing 50+ developers to mobile platform services, integration patterns and release-readiness practices.

Internal Products & Technical Tooling

- Built a Kotlin/Jetpack Compose sales tracking and lead capture app with a Next.js/MongoDB dashboard, adopted by 400+ Huawei employees to record device sales and customer information.
- Built an internal automation platform with Next.js, Node.js and MongoDB to streamline research, scraping and repeated workflows, saving approximately two hours per day on routine team tasks.
- Built APK analysis and automation tools using Node.js, Apktool and JADX to speed up technical assessment and troubleshooting.

Connected Device & Wearable Solutions

- Designed and built a reusable connected-device wrapper SDK for Android-to-watch synchronization, reducing repeated partner integration effort by 50%+ across three UAE mobility, government and banking applications.
- Delivered 20+ connected-device and wearable applications and 20+ Figma UI designs for partners including Emirates, MAF Carrefour, RTA and UAE MOI.

Full Stack Web Developer

Algebratéc Technologies

Nov 2018 - Nov 2019

Constantine, Algeria

- Built internal Angular and Laravel dashboards for client and API access management.
- Designed a modern WordPress company website to improve Algebratéc's online presence and client-facing brand presentation.
- Automated Angular project setup with Node.js scripts, reducing repeated setup work across customer projects.
- Developed PHP data collection tools and Swagger-UI documentation portals for integrations.

Android Developer

Independent Projects

Nov 2016 - Oct 2018

Constantine, Algeria

- Published 25+ Android applications on Google Play using Java, Android SDK, Firebase and Google APIs.
- Built Laravel REST APIs supporting mobile applications and developed games with libGDX.

SKILLS

Partner Solutions: Technical discovery, SDK/API integrations, partner troubleshooting, release support, developer enablement

Mobile: Android, Kotlin, React Native, Wearables, Connected Devices

Platforms: HarmonyOS, HMS, ArkTS, ArkUI, Firebase

Backend/Web: REST APIs, Next.js, Node.js, MongoDB, Laravel

Tools: Git, Android Studio, Gradle, Figma, Apktool, JADX, Swagger-UI, AI-assisted development workflows

EDUCATION

Bachelor of Computer Science

University of Abdelhamid Mehri

2015 - 2018

Constantine, Algeria
